Thermal-printed CD & DVD (full colour)

Specification

Submitting Digital Artwork

CD or DVD Onbody

- We can only accept digital artwork in High Res PDF format i.e. Print/Press Ready
- The file must be a compiled image and not colour separated
- The design must have a maximum diameter of 113mm and a centre hole of 43mm
- Registration/crop marks must be included
- All CMYK designs must be accompanied by a colour proof

Digital files can be emailed provided they are less than 5MB. Alternatively, files can be uploaded to our ftp server, the details of which are available upon request.

Inevitably with the supply of digital artwork, from time to time there may be technical issues that need correcting before we can print. We are equipped to rectify most small problems in-house however there may be a charge for this service (please speak to your project manager). In order to carry out changes to your artwork, it is always better for us to have access to the source files which can be supplied in the following formats:

- Photoshop files (including all images, fonts and layers)
- Quark files (including all images and fonts).
Versions supported: 4, 5 and 6
- inDesign files (including all images and fonts)
- Illustrator files (preferably with fonts 'outlined').
Versions supported: 9, 10, CS and CS2
- Tiff files (min 300dpi)
- EPS files (min 300dpi)

these will need to be supplied on Disk to your project manager:
